

Tools Currently Used to Create CD User Documentation

- Adobe FrameMaker 6.0 to create printable multi-chapter source document
- Quadralay's WebWorks Publisher Professional Edition 6.0.5 to convert FrameMaker output files to cohesive multi-page HTML document
- HotMetal Pro 5.0 to create web site around document and to edit WebWorks template files for each document (HotMetal is no longer commercially available)
- Adobe Acrobat Distiller 4.0 to create PDF of printable source files

■ Adobe FrameMaker 6.0

◆ Strengths:

- ★ Designed to create multi-volume, multi-chapter docs (books) with TOC, Index, Cross references
- ★ Highly configurable
- ★ Flexible formatting for printed docs

◆ Weaknesses:

- ★ Its focus is on printed rather than online documents
- ★ Medium-high single-user license fee
- ★ Not widely used at Fermilab

◆ Cost:

- ★ FrameMaker (Windows) v7.0 is \$799, v6.0 is \$449

■ Quadralay's WebWorks Publisher Professional Edition 6.0.5

◆Strengths:

- ★Designed specifically for FrameMaker docs
- ★A version is available for MS Word
- ★Handles TOC/Index/cross-ref links beautifully
- ★Highly configurable
- ★Easy to use once it's configured
- ★Quick html generation
- ★Can also be used for online help

◆Weaknesses:

- ★Complicated configuration (claim is: easier w/ 2003 version)
- ★High single-user license fee

◆ Cost: 2003 version (Windows) \$1295
